PROFILE

Software Engineer who builds, tests and refines web experiences. Two years of hands-on quality assurance across websites, UI mockups and graphic design, combined with AI-assisted web development: I set the direction and requirements, build with AI tools, then test the result on real devices before signing it off. Comfortable working remotely with a distributed team. Growing towards test automation and security testing.

10+ Websites tested	10+ UI mockups validated	30+ Flyers reviewed	8+ Logos reviewed
-------------------------------	------------------------------------	-------------------------------	-----------------------------

Approximate totals since October 2024.

EXPERIENCE

Software Engineer

Oct 2025 - Present

Remote software & design company · Remote

- Execute manual test cases and record results, defects and retests in the company's structured QA reporting dashboard; document bugs with screenshots and track work in Trello.
- Cover functional, UI, navigation, form validation, responsive, cross-browser and regression testing on real Android and iOS phones and tablets, and in Chrome, Safari, Firefox, Brave and Opera.
- Diagnose issues with Chrome DevTools (device mode, console, network, application, performance) and Lighthouse audits.
- Build web features with AI assistance (Claude, ChatGPT, Grok) in HTML, CSS, JavaScript, React and Next.js, including a bootcamp learning platform with lecturer and student dashboards and role-based admin settings.
- Rejected generic AI-generated designs and redirected them to the client's vision; caught a missed requirement (admin permissions without role limits) and resolved it with a detailed specification and moodboards.
- Validate UI mockups for flow and feasibility before design proceeds, and review finished designs for message clarity, hierarchy, audience fit and consistency.
- Design flyers in Adobe Photoshop and support designers with research, moodboards, themes and visual direction.

National Service Personnel

Oct 2024 - Sep 2025

Remote software & design company · Remote

- Built in-depth skills in manual QA testing and graphic design on live client projects; retained as Software Engineer on completion.

UiPath RPA Internship

Nov - Dec 2023

Accra Technical University · School-organised programme delivered by UiPath practitioners

- Introduction to robotic process automation with UiPath: how automations are built, and where they save time and reduce errors.

IT Intern

Oct - Dec 2022

Achimota Hospital · Accra

- Trained 12 incoming national service personnel on the hospital's LHIMS system, with supervisor approval.
- Supported the maintenance of internal software applications and diagnosed and resolved network issues.

Assistant Teacher

2021

Mini Miracles Montessori · Accra

- Coordinated classroom activities and explained concepts clearly to children and parents.

SKILLS

Quality assurance

Manual testing Functional testing UI testing Regression testing Responsive testing
Cross-browser testing Mobile testing Form & error-state validation Usability checks
UI flow validation Design validation Test cases & scenarios Defect reporting Retesting

Development

HTML CSS JavaScript Git & GitHub React (AI-assisted) Next.js (AI-assisted)
SQL basics (MySQL)

AI workflow

Claude (build) ChatGPT (prompt structuring) Grok (cross-checking)
Reviewing & testing AI-generated code

Tools

Chrome DevTools Lighthouse Trello Adobe Photoshop UiPath (introductory)

IT fundamentals

Network diagnostics Troubleshooting Windows Linux macOS

PROJECTS

Personal portfolio

Plain HTML, CSS and JavaScript, built with AI assistance and tested on real devices. Includes a QA Lab with runnable test cases.

Online bookstore (HND final-year project)

E-commerce site with user accounts and Paystack payments: HTML, CSS, JavaScript, PHP, MySQL.

The Odin Project

11 projects, Nov–Dec 2025, including Tic-Tac-Toe, a To-Do List app, Library and Calculator. On GitHub with live demos.

Campus Navigator app (university group project)

Android campus map app (Java, Google Maps API). My role: testing and presentation.

EDUCATION

HND Computer Science

Accra Technical University · 2022 – 2024

WASSCE (Science)

St. Martin's Senior High School · 2016 – 2019

TRAINING

CISA exam-preparation short course

University of Ghana, Legon · exam not yet taken

Google IT Support Professional; Introduction to Networking

Udemy

AI for Research workshop

MEST Africa · Sep 2026

LANGUAGES

English · fluent Twi · fluent Fante · advanced
French · basic
